Dip.BM - bioregulatory medicine

# Introduction

---

**Dr Damir A Shakambet, Dr Tatyana Bosh, Dr Athanasios Vouloumanos and Dr. Michael Tarabe from Hellenic and International Society of Bioregulatory Medicine present postgraduate specialisation in Bioregulatory Medicine**

The 'Bio-regulatory Medicine' course is presented by a team of Physicians experienced in the theory and practice of non-suppressive medicine. The course enables prospective students to gain knowledge in the theory and clinical practice of modern homeotherapeutics and clinical applications of bioregulation.

Bioregulatory medical paradigm is based on the quantum and system biology scientific model. The Bioregulatory treatment is based on eliminating multifactorial factors that block homeostasis, as well as stimulating homeostatic capacity for repair and healing.

Current conventional scientific methodology is effective in acute or emergency conditions, but has limitations in complex multifactorial degenerative conditions whereas bioregulatory treatment is efficacious. This course teaches methodology based on the systemic bioregulation, its principles and clinical applications.

The Course is a Postgraduate education level for medical practitioners but it is also accredited course at the Hellenic Society for Bioregulatory Medicine, the Institute for Natural and Complementary medicine (ICNM) in the UK and graduates will become affiliates with the International Society for Bioregulatory Medicine with its extensive continual medical educational programmes.

**Hellenic Society for Bioregulatory Medicine**

[inquiry@biomedic.co.uk](mailto:inquiry@biomedic.co.uk)

## Introduction

---

Contrary to the therapy based on aetiological causes of disease (reductionist view), which is based on the faulty pathophysiological process, the bioregulation restores homeostasis and treats a disease as an imbalance of the biological system. Homeostasis is a dynamic and adaptive function of cybernetic and automated nature. The overall body-mind-energy system is feedback system, which is highly adaptable and it is organised as a hierarchy of subsystems with self-regulatory capacity. Bioregulation balances the ground regulation at the cellular level but also higher psycho neuro immuno endocrine systems and re-establishes the tissue micro-environment informational capacity.

This course teaches Environmental medicine and treats disease in relations to its external and internal milieu, as a process with gradual dysregulation of the homeostasis perpetuated by underlying toxicity. Biologically active molecules Cytokines, Hormones and Neurotransmitters are used homeotherapeutically in order to balance biologically Psycho-neuro-immuno-endocrine axis. The homeotherapeutics treatments, covered in the course, teaches bio- informational nano-pharmaceutical treatment based on modern bio-medical science. The therapeutic potential of Nanopharmaceuticals is greater than ever, since it is now possible to target a particular faulty homeostatic feedback loop and re-establish its original informational flow.

Non-suppressive treatment is facilitated by various treatments that regulate Clinical Ecology (tissue pH and microorganisms balance), and Microcirculation by Nutritional and Oxygenative treatments.

This course teaches Psychosomatic strategies and the process of morbid patterns that change perception and encapsulate rigidity of homeostasis.

The Course pays a particular attention to Preventative medicine and originally defined Presomatic Syndrome its signs and treatment.

## Background Information

---

### The Academy for Bioregulatory Medicine

The Academy for Bioregulatory Medicine is medical education charity in the United Kingdom and it is a leading International institution in the field of integrated medicine and new advanced medical disciplines based on system biology sciences. The Hellenic Academy provides the knowledge, skills and ethos required for personalised health care. The courses in Greece provides medical education for the increasing incidence of predominantly chronic, degenerative and malignant diseases, as well as in the area of preventative medicine.

### Integrative Bioregulatory Medicine

The bioregulatory medical system utilises healing capacity of self-regulatory homeostatic feedback loops. Homeostasis is a dynamic body-mind-energy system that is highly adaptable and it is organised as a dynamic balance in a order of subsystems hierarchy between the ground cellular regulation and higher psycho neuro immuno endocrine and bioenergetic systems. This exciting new scientific paradigm brings together medical sciences with system biology and electrophysiology, enabling clinical applications of bioenergetic and bioresonance therapies. Contrary to the reductionist view of single aetiological causes of a disease, the bioregulation restores homeostasis and treats a disease as an imbalance of the biological system.

### Academy Courses

Medical protocols taught on the courses integrate various modalities into generalised medical approach. The Bioregulatory Medicine courses are presented by a team of Physicians experienced in the theory and practice of non-suppressive treatments. Each Course is a part of Integrative program of therapies that deals with multifactorial and multilevelled aspect of disease process. This Prospectus is focused on the Diploma in Bioregulatory Medicine therapies and necessary adjuvant therapies. The adjuvant therapies are integrated bioregulatory protocols of Clinical Ecology, Nutrition, Environmental medicine, Homeotherapeutics and Psycho-therapeutic disciplines.

## Aims and Objectives

---

The Course provides a training 'in-house' with self-study and work assignments, containing sufficient 'need to know' subject material and practice methodology to enable successful candidates to prescribe their modality (therapeutic discipline) of Homeotherapeutics and Bio-regulatory medicine.

- The prospective students will be able to practice Bioregulatory Medicine and prescribe homeotherapeutics in a manner, which is as follows:
  - ethical
  - safe-minimal side effects
  - effective
  - best practice
  - knowledge of diagnostics to ensure referral where necessary
- To provide teaching facilities for candidates to achieve practice standards to enable them to be accepted on to the Register of Bioregulatory Practitioners of Intl. and Hellenic Society for Bioregulatory Medicine.
- To teach students sufficient Bio-medical Sciences, Classical Homoeopathy, Complex Homeopathy, Homotoxicology, all known as a Homeotherapeutics, in addition to General Bioregulatory Diagnostics and Therapeutics, to ensure the above aims
- To provide adjunct ancillary reading resources, work assignment and adequate standards of assigned case history to bring learning and attainment within the guidelines as laid down by the National Occupational Standards for the self-regulating body in the modality
- To follow Continuous Academic Assessment Procedures in respect of Work Assignment monitoring, Case History determinants and Examination procedures so as to facilitate the above aims

## Course Objectives and Methodology

---

### Student orientated

To receive adequate structured 'in-house' and guided 'Self-study' teaching, and supported Learning Guidelines in covering the syllabus parameters to achieve the aims of the Course

To be aware of tutor support facilities, administrative support facilities and their easy and regular availability; each student will have a designated 'Personal Tutor'

To receive comprehensive teaching in a consistent style of approach, with continuous assessment procedures, together with attainment monitoring, and total guidelines of subject knowledge, methodology and 'need to know' parameters

### Course Manual provides

Dates, timing and key summaries of all lectures

Obligatory textbook and reference pages to lectures

Addition to textbooks and lectures 'need to know' subject material

Background reading parameters and guidelines

Work Assignments and 'completion to standard' guidelines

### Course Prerequisites

Complete Application Form and forward fees

Obtain obligatory textbooks and Complete Background reading

Commence reading, study and submit the obligatory Assignments

Attend all weekends, submit all Work Assignments and Case Histories

### Course Policy

Course Policy stipulates the obligatory aspects of the course described in the text hitherto

No sound recording or video recording allowed

No mobile phones

Aim to arrive 5 minutes before lecture timings

Work assignments submitted on due dates.

## Course Structure and Dates

---

### Structure and Hours

The Diploma in Bioregulatory Medicine is based on completing **Four Modules** of 50 credits, or 500 hours of lecture and study (each credit represents 10 hours), during a course of one calendar year

### Module Structure

Each Module consists of 125 hours of in house and homework learning divided as follows:

Course attendance	42 hours
Webinar lecture	3 hours
Home study	40 hours
Coursework assignments	30 hours
Personal and professional integration	10 hours

### Module Dates

<i>Module 1</i>	June - October 2016
<i>Module 2</i>	October - December
<i>Module 3</i>	December - March 2017
<i>Module 4</i>	26 March 2017 - evaluation and exam

Dissertation *and Assessment in March 2017*

### In-house weekends (lectures and practicals)

<i>Module 1</i>	24-26 June 2016
<i>Module 2</i>	14-16 October
<i>Module 3</i>	16-18 December
<i>Module 4</i>	24-26 March 2017

*Examination* 26 March 2017

## Evaluation and Exam

---

### Qualifying Examination Parameters

Pass	60%
Credit	70%
Honours	80% (1st class >91%)

### Attendance, Course Work and Home Work

- Attendance, Course Work, Four Work Assignments and Ten Case Management Studies with Dissertation attract 40% possible marks
- The Examination attracts the balancing 60%

Completion of Work assignments, Case histories and Attendance is obligatory.

Re-sit students must undertake the whole examination after a minimum period of 3 months.

After successfully completing the examination candidates gain DipBM, and are eligible to apply to membership of MBRCp and MISBM and MHSBM (Hellenic Society for Bioregulatory Medicine-Specialist Register) for memberships and registration.

### Examination Entry Parameters

Candidates must complete the examination entry form and submit it 28 days prior to the scheduled exam date.

Entry to Examination is permitted only after the satisfactory completion of the course together with Work Assignments and Case Management Studies.

## Evaluation and Exam

---

### Exam

Evaluation and Exam including Dissertation that consists of **course-work** and **Exam** which consists of two parts:

- a) two sort essays and
- b) twenty short questions

#### Part one - essay type answers (40% of total marks)

Two questions to be answered in 2 hours

- a) 1 question – Bioregulation/Homeostasis (choice of two questions) 20%

- b) 1 questions - Homeotherapeutics (choice of two questions) 20%

#### Part two - short type answers (20% of total marks)

Questions to be answered in a duration of 1 hour and 15 minutes

- a) short answer questions (20) 20%

#### Part three - Dissertation consists of Course work (40% of total marks)

The text of overall Course work is assessed in addition to the clinical cases.

40%

## General Informations: Dates and Applications

### Course Dates

The course runs in Four Modules of teaching and practicals. In house lectures are carried out during week days hitherto.

The final exam and evaluation is scheduled during Module Four.

Course: 2016		
Module	MODALITY	DATES
<i>Module 1</i> <i>Module 2</i> <i>Module 3</i> <i>Module 4</i>	<i>In-house</i> <i>(lectures and practicals)</i>	<i>24-26 June 16</i> <i>14-16 October</i> <i>16-18 December</i> <i>24-26 March 2017</i>
	<i>Examination</i>	<i>26 March 2017</i>

## General Information: dates, timetable and Applications

### Module Timetable

Each teaching days are divided into four sessions, with short break, and lunch break between 13:00 and 14:00.

Session I	tea break	session II
<b>10:00 – 11:15</b>	11:15-11:30	<b>11:30 - 13:00</b>
lunch break 13:00 - 14:00		
Session III	tea break	session IV
<b>14:00 – 15:30</b>	15:30-15:45	<b>15:45-17:00</b>

Applications are now being invited for the Course Membership Programme. Successful applicants will be informed in written form about the Course place, precourse reading and in some cases an interview will be arranged to guide student, prior to the Course commencement.

To apply for the Course, please fill in the application form that can be downloaded from the website or in the last page of the Prospectus and send it to us together with:

- Your curriculum vitae including any relevant personal or professional development, seminars or courses undertaken to date
- Application Form and
- Course Fee

Any payment will be fully reimbursed for unsuccessful applicants. If you are awarded a place and you enrolled to the Course, the Fee is refundable up to three months prior to the start of the course, less 10% administration fee.

Fill in application on the last page  
of the Syllabus and forward it with  
payment to the Registrar

## Diploma, Membership and CPD

---

### Diploma

After completing in house lectures and passed exam of oral and written parts, the students are awarded Diploma (**Dip. BM**) in Bioregulatory Medicine as a medical speciality, that includes Homeopathic classical practice enriched with nanopharmaceutical Homeotherapeutics.

Diploma is also awarded in Bioregulatory medical adjuvant therapies, in order to accelerate and deepen therapeutical response, particularly for chronic and degenerative pathologies.

### Membership

Graduates are eligible to be registered as a board registered Specialist in BM at the Hellenic Society for Bioregulatory Medicine and International Society of Bioregulatory Medicine in London (**MBSBM London**).

### Continual Professional Development

For our members and fellows we shall be organising annual seminars with new methodologies from different bioregulatory areas from worldwide experts.

## Syllabus: Overview

### Module One

lectures	practical
<p>Principles of the Bioregulatory Medicine</p> <p>Systemic Biology and Homeostasis</p> <p>Presomatic, dysfunctional process and Psychosomatisation</p> <p>Detoxifying Systems</p> <p>Bioregulation of Skin, Liver, and Mucosas</p> <p>Microcirculation of the Biological terrain</p>	<p>Principles of Bioregulatory treatment</p> <p>Bioregulatory medical Anamnesis</p> <p>Treatment protocols and strategy</p> <p>Therapeutical rapport and Patient management</p> <p>Acupuncture and biological meridians (1st part)</p> <p>Detoxifying procedures</p> <p>Microcirculatory and pH balancing</p>

### Module Two

lectures	practical
<p>Bioregulatory treatment in inflammatory phase</p> <p>'PNEI system of biofeedback control'</p> <p>Bioregulation of the PNEI- (psycho- neuro-immuno-endocrinology)</p> <p>Bioregulation of the inflammatory disorders</p> <p>Immunomodulation of the Allergic and Immune diseases</p>	<p>Application of the PNEI orientated treatment in practice</p> <p>Removing traumatic Perception (clinical Hypnosis)</p> <p>Bioenergetic and somato emotional release</p> <p>Psychosomatic Treatment</p> <p>Bioregulatory Detoxifying Nutrition</p> <p>Obstruction of biological and tendinomuscular meridians</p> <p>Nutrition and Antioxidant therapy</p>

### Module Three

lectures	practical
<p>Bioregulatory Treatment of Degenerative Diseases</p> <p>Treatment strategies of degenerative phase of disease process</p> <p>Bioregulatory treatment of respiratory, digestive and genitourinary problems</p> <p>Cardioangiology Bioregulatory protocols</p>	<p>Invasive and manual Bioregulatory techniques</p> <p>Acupuncture and acupressure (2nd part)</p> <p>Bioresonant and electromagnetic physiological approaches</p> <p>Activation of the nervous system-craniosacral concepts</p> <p>Biopuncture and nosodes and sarcodes application</p> <p>Oxygenation protocols</p>

### Module Four

lectures	practical
<p>Bioregulatory Oncology</p> <p>Oncology, treatment and prevention</p> <p>Bioregulatory treatment of tendino-osteo-muscular and connective system</p>	<p>Isopathy, specialised biopuncture and postural treatment</p> <p>Bioregulatory manipulative alignment</p> <p>Isopathy and autosanguis treatment</p> <p>Bioregulatory aesthetic treatment - Biofacelift</p> <p>Bioregulatory ophthalmology and dentistry</p> <p>Chelation treatment</p>
Exam and Evaluation	

## Syllabus: Teaching Modules One

### Aims of Module One

To expand medical pathophysiology to the scientific basis of Homeostasis and System theory

To understand process oriented and system approach of ethiopathogenesis in a context of homeostatic feedback

To clinically apply nanopharmaceuticals and detoxifying activation of the homeostasis

Understanding of the Bioregulatory protocols and Somato-Psycho-Energetic process

### Curriculum Module 1

System Theory and Cybernetics

Stages of Disease evolution

Presomatic Syndromes

Psychosomatic Process

Hippocrates to Hahnemann and Homeotherapeutics

Present day Nanoscience - theory of minimal dosage

Biofeedback mechanisms, thought, emotions in our understanding of health and pathology

Incorporating non-linear thermodynamics, entropy in our understanding of the organism

Principles of Clinical Ecology in Bioregulatory medicine:  
Tissue Acidity and Microcirculation  
Bioregulation of the Skin, Hepatobiliary and Mucosal detoxifying systems

### Clinical Module 1

Bioregulatory Diagnostic procedures on four different levels; mind body and bioenergetic communicational levels

Taking patient history of disease with psychological and physical anamnestic complementarity, with reference to vitalistic anamnesis

Applied Bioregulation and Patients Management, and creation of the treatment Protocols

Clinical practice of somatic and bioenergetic level of dysfunction and practical applications of tissue and electromagnetic functionality by introduction of acupuncture and connective tissue release techniques

Bioregulatory Clinical Ecology with detoxifying procedures and tissue pH and Microcirculatory balancing

## Syllabus: Teaching Modules Two

### Aims of Module Two

To understand higher system control axis of PNEI and its interaction with lower ground regulating system (GRS)

To understand homeostatic potential of PNEI system control and its role in bioregulatory treatment

To apply clinically effective treatment in inflammatory phase of disease process

To apply Treatments of mental processing nature and treatment based on the body biological restrictions and bioenergetic blockages

### Curriculum Module 2

Psychology and mind processing events and interference with Disease process

Selye's and Hammer's stress responses and its role in disease process

Hormonal system interaction with Mind and lower system levels and therapeutical implications

Immune system interaction with network systems and therapeutical implications

Mechanism of Inflammation and factors involved in antiinflammatory treatment

Characteristics of Inflammatory stage of disease in various systems - signs and diagnosis

Inflammation and antiinflammatory multilevelled treatment of PNEI and GRS nature

### Clinical Module 2

Patients-Practitioners Rapport and reconditioning patients perception

Induction and subconscious modulation of psychosomatic and psychovegetative patterns of homeostatic imbalance

Distribution of the biological meridians  
Signs and symptoms of biological blockages

Treatment of the bioenergetic blockages

Understanding tendinomuscular vitalistic responses and segmental interrelationship

Antiinflammatory Homeotherapeutics

Bioregulatory protocols in Inflammatory phase of Diseases process

Clinical application of the  
Bioregulatory Nutrition and  
Antioxidant therapies

## Syllabus: Teaching Module Three

### Aims of Module Three

- To understand pathophysiology and system signs of degenerative phase of disease process
- To apply effectively integrative bioregulatory protocol in Degenerative conditions
- To apply Homeotherapeutics and Psychosomatic treatment in degenerative conditions
- To apply treatment utilising electrophysiology; acupuncture, musculo-connective release technique and invasive bioregulatory techniques

### Curriculum Module 3

Diagnostic multifactorial algorithm  
parameters of degenerative conditions

Protocols for network system imbalance  
of Ground and PNEI system regulation

Devising protocols of degenerative  
conditions incorporating Nutritional,  
Detoxifying and other Adjuvant therapies

Degenerative Cardiovascular disorders

Bioregulatory Gynaecological treatment

Protocols of Degenerative Gastro  
Intestinal disorders: Chronic gastritis,  
precancerous intestinal pathologies

Degenerative respiratory conditions:  
Bronchiectasie, Pulmonary fibrosis,  
Chronic sinusitis and upper respiratory  
tract disorders

Chronic disorders of urogenital tract:  
Cystitis, Nephritis, Chronic Renal failure,  
Prostatitis, precancerous UG conditions

### Clinical Module 3

Distribution of the biological meridians  
Signs and treatment of blockages

Musculo connective body release  
techniques - release of the Muscular and  
soft tissue restrictions

Dural and ligamentous system of tension

Advanced Invasive procedure:  
Biopuncture and Segmental therapy

Clinical Patients practice of Degenerative  
stage of disease process

Bioregulatory protocols combining  
Homeotherapeutics, Detoxification, PNEI  
regulation and Somato-psycho bioenergetic  
therapies

Oxygenation therapies and chelations for  
deep detoxification and alkalisation of  
degenerative conditions

# Prospectus Dip.BM 16

## Syllabus: Teaching Modules Four

### Aims of Module Four

To understand pathophysiology of malignant phase of disease process

To apply Homeotherapeutics and Bioregulatory medicine in malignant conditions

To apply advanced invasive methods of Bioregulatory treatment: Isopathy, Autosanguis, and other specialised techniques

Assessment of the students in Bioregulatory Medical specialisation

### Curriculum Module 4

Early Diagnosis of malignant conditions

Devising protocols for malignancies by incorporating Homeotherapeutical, Nutritional, Detoxifying and PNEI regulating procedures

Chronic disorders of Musculo-skeletal disorders

Postural and Emotional aspect of osteomuscular system

Geriatrics and Obstetrics - 'cyclical rites of passage'

Revisions

### Clinical Module 4

Practical Postural and Manipulative assessment

Practicals in Isopathy and Autosanguis Therapy

Bioregulatory Ophthalmology and Dentistry

Bioregulatory Aesthetic Treatment - 'Biofacelift'

Revisions

### Exam and Dissertations

Exam

Dissertation

# Terms and Conditions Spec. Cert. BM

## General Terms and Conditions for Participants 2016/17 intake

---

### 1. Registration fees (Course deposit)

All participants must pay the registration fee at the time of booking an event. Participants can request a reprint of their receipt and these requests will be completed immediately and sent via email. Full course fee must be paid prior to the event commencement.

### 2. Cancellation Policy

Registration cancellations must be notified in writing by fax or email to the booking agent. Cancellation of more than 45 days from the first day of event are eligible for full refund of deposit and/or course fee.

Cancellation received less than 45 days prior the first day of event will receive a no refund **of registration fees or course fee.**

Cancellations made within 45 days of the event, will receive 50% of the value of the paid fee as a credit, to be used within 18 months from the date of the credit.

Participants must make sure they receive an acknowledgement of their cancellation.

### 3. Liability

ISBM reserves the right to amend any part of the event programme if necessary at any time. ISBM will not accept liability for damages of any nature sustained by delegates or accompanying persons, or loss of, or damage to their personal property as a result of any or all events. In the event of unforeseen circumstances, ISBM accepts no responsibility for loss of monies incurred by delegates. Delegates should make their own arrangements with respect to personal insurance, along with travel insurance.

### 4. Personal Insurance

ISBM cannot be responsible for healthcare, dental and ambulance services during its conferences or events. ISBM strongly recommends that participants take out comprehensive medical and travel insurance, which should cover the possibility of flight cancellation due to strikes and other causes. Therefore, ISBM and its local co-organisers accept no responsibility of any nature whatsoever for personal injury, death, loss or damage to property or participants however caused or arising.

# DIPLOMA COURSE APPLICATION

## BIOREGULATORY MEDICINE

Please note that all applications are subject to review and acceptance by the Academy Board. Successful applicants will be offered the place by the Course Principal in written form.

### 1. General details
